

APPLY TO BE AN ARPA-E FELLOW!

DESCRIPTION:

The Department of Energy's Advanced Research Projects Agency – Energy (ARPA-E) is looking for Fellows to help contribute to the direction of energy innovation.

ARPA-E provides a unique opportunity to work alongside colleagues from diverse science and engineering backgrounds towards a common goal of changing the world through energy technology. Fellows gain experience in evaluating novel research and commercialization concepts and crafting funding opportunity announcements. With their experience at ARPA-E, Fellows go on to a variety of exciting careers in energy including at startups, venture capital, non-profits, government, and academic positions.

What we are looking for:

- Early-career scientists and engineers passionate about transforming the energy landscape;
- Technical experts interested in translating transformational research into commercial success;
- Creative thinkers willing to work with experts from diverse science and engineering backgrounds

What you will do:

- Identify technological whitespaces and conduct independent research and analysis;
- Evaluate new energy technologies across diverse areas of science and engineering;
- Contribute to new program development and funding opportunity announcements

Paid federal position with benefits.

"The only problem with this job is figuring out a next step that can possibly measure up to it."

Dr. Ashwin Salvi
ARPA-E Fellow 2013 – 2015

ARPA-E Fellows do not perform laboratory research or directly engage in policymaking.
